Global Top 100 Global Specialty Chemical Companies

Methodology, Data Sources, Limitations

What is the data source for this report?

This report has been compiled from our online analytical tool, [Global Public Companies - Revenue Dashboard \(aranca.com\)](https://aranca.com). Data for this analytical tool in turn has been curated from income statements that we source from a vendor of Financial APIs, and supplemented with inputs from company filings, where required.

Does the Revenue and Rankings dashboard cover all publicly-traded companies?

We estimate our coverage to currently be in the range of 95%, with data on some frontier markets being the main gap. Our endeavor is to reach a 99% coverage level as soon as possible. To that extent, we acknowledge that we may have missed out on one or two companies of interest to you in a particular industry or country.

What is your basis of segmentation or classification?

From a segmentation perspective, we have currently used standard industrial classification and HQ country as filters. Going forward, Aranca will leverage its extensive internal expertise of global markets / industries to build its own taxonomy (sub-segments) for different industries. This will make the benchmarking exercise even more relevant and insightful.

How frequently are these reports updated?

We will be updating these reports once a fortnight to ensure that latest filings from across the globe are captured as frequently as possible.

Have been growth rates been calculated based on reported currency?

All growth rates presented in this report have been calculated based on reported currency, unless otherwise specified. US\$ equivalent revenues, calculated from time-series exchange rate data, have been used to rank companies based on sales

How accurate is your dataset?

While we have implemented several measures to ensure accuracy of the information provided here, there are chances of errors in 1% of cases. These errors are mainly around filing date mismatches, reporting currency and data missing for some quarters.

What are the terms and conditions relating to use of this dataset and the online dashboard?

The data here can be used for supporting internal business or investment decisions. All information is provided on an 'as-is' and "as-available" basis, and we make no representations or warranties of any kind, express or implied, as to the content or material included on this document or on the website tool. No content may be reproduced, republished, sold, licensed, or otherwise exploited for any commercial purpose whatsoever, without our prior written permission.

Where can we get more information on a company or industry?

You can leverage our online analytical tool, [Global Public Companies - Revenue Dashboard \(aranca.com\)](https://aranca.com), for more information on over 27,500 global companies

Decide Fearlessly

From startups to the Fortune 500, private equity and global financial firms –
